

Tina McMartin leads Freese and Nichols' Water Resources Design team in Central Texas and is a firm Associate. She specializes in the design, rehabilitation and inspection of dams. She has served as Project Manager on dam rehabilitation projects of all sizes, historic dam improvement projects, and numerous studies; she enjoys helping clients solve complex problems and maintain their valuable infrastructure. She works with dam owners to develop emergency action plans and facilitates tabletop exercises.

Janis Murphy is a senior project manager and an Associate with Freese and Nichols whose experience includes the study, design and inspection of water resources-related structures. Janis has been Project Manager and Project Engineer for TCEQ and FERC Part 12 dam inspections, hydrologic and hydraulic analyses, and emergency action plans, as well as the rehabilitation design for dozens of dams across Texas, with construction costs totaling more than \$250 million. Her experience includes dam-safety programs for small privately and municipal-owned dams to some of Texas' largest dams and reservoirs owned or managed by river authorities and water districts.

Daniel Meyer (Executive Manager) of Plum Creek Conservation District (2008-Present) is involved in the day-to-day operations of 28 flood control structures that are located along the tributaries of Plum Creek(Hays and Caldwell Counties). In addition, he is involved in the district's groundwater responsibilities under Texas Water Code chapter 36 managing to conserve, protect, and preserve its aquifers. When not working Daniel enjoys traveling with his wife Tammy and spending time reading and watching sports ...mainly football.

Tyler Farco (Staff Member) of Plum Creek Conservation District (2023-present) carries out a wide range of responsibilities for the, "dual- function," District (Water Control and Improvement District and Groundwater Conservation District). He performs maintenance and operation inspections/procedures on the District's 28 dams, Manages the groundwater database, performs water well inspections, and develops relationships with well owners and landowners subject to District easement(s).

Alan Burklund (Project Manager) at Plum Creek Conservation District (2018-Present). He assists with managing various maintenance projects, the day-to-day operations of the 28 flood control structures, and with district's groundwater responsibilities.
